## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see "REMARKS" (specifically page 9), filed June 9, 2005, with respect to claim 61 have been fully considered and are persuasive. The rejections of claims 61-65 and 68-70 have been withdrawn.

### ***Allowable Subject Matter***

Claims 61-65 and 68-70 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including a first conductive wiring layer within the trenches and partially filling the trenches, the first conductive wiring layer comprising n-type conductively-doped silicon; porous silicon over and directly against the n-type conductively-doped silicon of the first conductive wiring layer within the trenches, the porous silicon being p-type doped; and an active molecular switchable memory material within pores of the p-type doped porous silicon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
